

Addition or Subtraction War

- Using your deck of cards, play with a partner
- Shuffle and deal all of the cards, face down, between the two players
- Player 1 flips out two cards, and adds them up
- Player 2 flips out two cards
- The player with the highest sum gets to keep that round of cards
- If matching sums occur, repeat until a sum is greater
- Play continues until one player is out of cards or a timer sounds, in which case the player with the most cards wins
- Variation
 - Play so that the player with the lowest sum gets to keep that round
 - Play with the number cards as a multiplication game (second graders)
