

# Head to Head

This game can be played with addition or subtraction flash cards. (For a simpler version, use number flash cards.)

1. Shuffle flash cards. Deal an equal number to each player.
2. Keep all cards face down so you can't see them.
3. Each player turns over their top card and places it in the center.
4. Each player solves the fact and calls out the answer. (Parent may assist by using a number line, counters, etc.)
5. The player with the greatest answer wins both cards and adds them to their "winning pile".
6. Play continues with the next card.
7. The winner is the player with the most cards in their "winning pile".
